How Does CDARS Work?

Institutions, like our bank, that offer CDARS are members of the IntraFi network. When we place your funds through the CDARS service, that deposit is divided into amounts under the standard FDIC insurance maximum of \$250,000. The funds are then placed in CDs at multiple network banks. As a result, you can access coverage from many institutions while working directly with just one.

You receive one regular statement from our bank for each service in which you participate, and, as always, your confidential information is protected.

A list identifying IntraFi network banks can be found at www.IntraFi.com/network-banks. Certain conditions must be satisfied for "pass-through" FDIC deposit insurance coverage to apply. To meet these conditions, deposit accounts are titled, and deposit account records are maintained, in accordance with FDIC regulations for pass-through coverage.

Deposit placement through an IntraFi service is subject to the terms, conditions, and disclosures in applicable agreements. Deposits that are placed through an IntraFi service at FDIC-insured banks in IntraFi's network are eligible for FDIC deposit insurance coverage at the network banks. The depositor may exclude banks from eligibility to receive its funds. Although deposits are placed in increments that do not exceed the FDIC standard maximum deposit insurance amount ("SMDIA") at any one bank, a depositor's balances at the institution that places deposits may exceed the SMDIA before settlement for deposits or after settlement for withdrawals. The depositor must make any necessary arrangements to protect such balances consistent with applicable law and must determine whether placement through an IntraFi service satisfies any restrictions on its deposits.
